Subject: User statement from Christopher Scott about the Spectro LFP RT

Christopher Scott, owner of **Hampton Roads Giclee**, was one of our first North American customers to purchase the BARBIERI Spectro LFP RT. Christopher produces wide format inkjet print reproductions for hundreds of artists in his area. His commitment to creating museum quality fine art reproductions for his clients was his motivation for purchasing the Spectro LFP RT. He gave us some very important feedback about his experience with our instrument which enabled us to improve the unit to the final stage which it finally has reached.

Christopher describes his experience with the Spectro LFP RT as follows:

"I am very pleased with the final design and operation of the BARBIERI spectrophotometer Spectro LFP RT. It is a unique device that offers the user benefits not found in other devices in its class. The speed and accuracy of the instrument makes the Spectro LFP RT an unbeatable choice for production oriented, high quality print environments.

I know that I'm not a 'typical user' for such an instrument. I prefer to design my own test charts and then use PhotoShop to adapt them for use with the Auto-Positioning guides. Then, with the Spectro-xy software, it is easy for me to create a template to read my custom test charts.

The Spectro_xy software, along with the solid reliability of the BARBIERI Spectro LFP RT, gives me the worry free, creative flexibility I need to meet my particular profiling requirements.

My investment in both of BARBIERI's flagship spectrophotometers, Spectro 100xy & Spectro LFP RT, has resulted in my complete confidence in the accuracy of the spectral and density measurement data I create for my RIP linearizations and output profiles, as well as the reference files I create for my scanner targets.

I have been impressed with the support and assistance BARBIERI provided after the sale to ensure my complete satisfaction with my purchase. For this, BARBIERI maintains my loyalty and can expect that I will purchase their product again in the future."

Thanks to Mr. Christopher Scott for his consent to publish this statement.
