

BARBIERI PRODUCT FEATURES

Must-have color measure technologies
in professional digital printing

1. INTELLIGENT CHART DETECTION

The camera and special software algorithms detect the center of each patch. With this solution also distorted charts and textiles can be measured automatically.

3. BACKLIT MATERIAL

Integrated transmission unit in addition to reflective measurements.

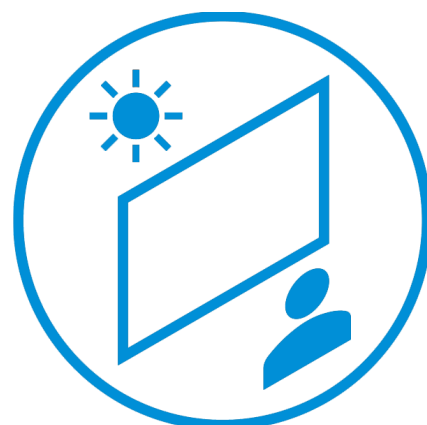

5. DISPLAY, WIFI, BATTERY

The integrated display indicates LAB values, Delta E and Pass/Fail. Thanks to battery operation and WiFi interface the device can be operated wirelessly.

2. VARIABLE APERTURE

Different structures require different measuring apertures. By using a motor driven optical zoom, the aperture size can be adapted automatically.

4. AUTOMATED MEASUREMENT

Thanks to the fully automatic operation color charts can be measured automatically

6. BARBIERI QB TECHNOLOGY

Our qb technology stands for high precision. D50 LED illumination and next generation of spectral core.
